

Bermuda Market Practice

Lindemann Miller attorneys have been serving Bermuda Market insurers since 2001. Our deep understanding of the unique commercial, coverage and relational aspects of the market enable us to provide a level of service that can be derived only through many years of experience. As the former leadership of the Bermuda practice group for a leading international law firm, our firm was founded upon, designed for, and remains dedicated to Bermuda Market service.

We provide U.S. attorney, U.K. solicitor, and non-attorney specialist services to offer a seamless, non-redundant, and cost-effective vertical integration of the full spectrum of insurance services. Our services encompass pre-binding underwriting consultation, manuscript endorsements and wordings advice all the way through claim monitoring, coverage analysis, and claim resolution, whether contentious or non-contentious.

We have validated clients' arbitration provisions through litigation and dismissal of U.S. proceedings, and secured anti-suit injunctions from U.K. courts to prevent U.S. proceedings. Applying both commercial sensibility and seasoned litigation skills, we have championed our clients' interests in international mediations and arbitrations. Our combination of experience, dual-qualification, innovative service options, client-first flexibility, and extensive commercial relationships create an unrivaled client value.

Additional services include our audit practice founded on our extensive prior internal audit experience. This enables Bermuda insurers to add technical support to their own internal teams, across almost every line of business, or deploy our turn key solution, as appropriate.
